

# Spring Term Overview

## Raging Rivers – Geography

Our topic this term is on Rivers where we will be investigating areas such as: the features of a river, erosion, rivers of the world which then concludes with a mini project: 'How can we hold back the River?'

Our mini project will have a look at the James Bay song 'Hold back the River' in reading comprehension and lead us to becoming song writers ourselves!

## Living things and their habitats – Science

Children in Year 6 covered this in Year 5 so we will be putting their memories and research skills to the test! With our new laptops we will be improving our digital literacy abilities to create a PowerPoint presentation, taking our research skills further to become experts.

## English and Maths

English this term will help our Year 6's become more independent! We will be looking at formal writing in Newspaper articles and non-chronological reports. Our narrative writing will be inspired by the novel 'Beowulf' and look at developing atmosphere within our description.

In Maths we are focusing more on problems to help apply our knowledge. We will continue to develop our understanding with our fractions, decimals and percentages work as well as look at co-ordinates and statistics.
